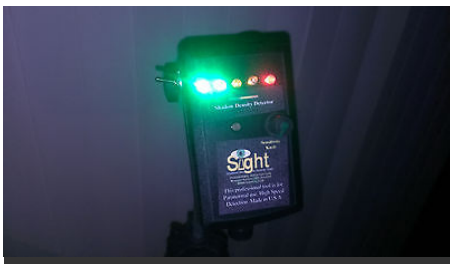
4. If you find that the brightness of the laser beam is seriously reduced Please note that to charge the battery or replace battery.

Package Included:

1x Green Laser Pointer Pen (Batteries Not Included)

Shadow Density Detector



Unit Price: $45.00

This All NEW idea came to us one day, why not measure the brightness of the light rather than just alert the user that the light changed, so here we have the Shadow Density Detector. With 5 leds, and a tone speaker, we can measure how dim the light is now, and find out for sure if its paranormal by watching the bar-graph on it. the dimmer the laser light gets, the more leds light up. Laser is included in this package.

To Operate:
Make sure you start with a fresh 9 volt, and set this unit on a tripod, along with your laser. Aim the laser on the sensor, we recommend maybe bouncing the laser back and forth a few times with mirrors to cover more area. once the laser is dead center on the sensor, then set the sensitivity of the unit by turning the knob until the first led lights up, then gently turn the knob back to just turn off the led. then that's it, its set and ready for action. Now, through the night, might want to check and make sure the laser ain't dimming, as this will cause the meter to light up leds.

Note: Battery and tripod is not included
(Note: All details may not completely match photo, like label, but all functions are the same.)
The laser that comes with this unit is for testing purposes, we recommend you purchase an 5mw laser pin.

Unit Price: $45.00

Shadow Detector with Pir True Motion Detection

This shadow detector is equipped with a motion pir sensor. The motion sensor can sense movement up to 10 feet away. To verify the shadow movement, the shadow detector wasn't enough, but with the motion sensor, if any mass is detected with the laser, and both leds comes on, its a good chance that it has just seen the shadow move. And with a camera behind the detector, you should have caught the entity.

Digital Stereo Rechargeable EVP Recorder

Unit Price: $35.00

Looking for a crystal clear Stereo EVP Recorder, well look no further. This affordable evp recorder has built in rechargeable batteries to save you money on your Ghost Hunts. 680Hour Memory recording time has enough room for your ghost hunts. Record time on full battery is 20hours, Play time on full battery is 12 hours, and it takes approx 3 hours to charge the battery. Easily transfer data thru the provided usb cable. Computer recognizes this as a flash drive.

1PCS USA 8GB Digital EVP Recorder Rechargeable Dictaphone Telephone MP3 Player

Introductions:
This is a [8GB] USB Flash Digital EVP Recorder with MP3 Function.
It is rechargeable .ONLY Supports record in WAV formats. Long time voice recording.
Features
1.Separated recording & playing keys: one key for recording, one for playing
2.VOR system: Voice Operated/ Activated recording (Automatically starts recording when there's sound and pauses when there's no sound.)
3. Six recording modes: Fine REC,Fine VOR
4."HQ REC" for high quality recording voice without distorting.
5."Long REC" for long time recording
6."HQ VOR" for high quality recording under voice activated recording
7."Long VOR" for long time recording under voice activated recording
8.Sleek appearance design and comfortable touch
9.Recording telephone conversation
10.Connect the recorder with the telephone via telephone adapter, the recorder can record telephone conversation
11.Support PLay multiple audio format, only support play MP1/MP2/MP3/WMA/WMV/ASF/WAV
12.No need USB driver
13.You can get the files in the recorder by connecting it to your PC with USB cable(include)
Specifications:
1.Memory: 8GB
2.With LCD display
3.Built-in speaker
4.Music playing function
5.128X64 lattice screen
6.Different languages
7.Recording indication

8.Sound control function (VOR) available
9.7RQ modes: POP, ROCK, POP, CLASSIC, SOFT, JAZZ and DBB
10.Battery low power indication
11.Built-in Lithium battery, rechargeable, saving your money and worry and protecting the environment
12.Working temperature: 0~40ºC
13.With a clock function, since set the right time, it can display the current time while recording, and display the time
as well as how many minutes it recorded on the computer.
14.Built in lithium battery: 420mAh

Size: L 8.4cm X W 3.3cm X H 1.3cm

HQ (high quality mode) 384Kbps 48khz about 3mb for 1 minute ,8GB can record about 42 hours
Long REC mode(telephone quality) 32kbps 8khz about 0.25mb for 1 minute,8GB can record about 500 hours,
fine REC mode 192kbps 24khz about 1.4mb for 1minute,8GB can record about 90 hours

Note:
1.Before you charge the recorder, you should turn it on. Just push the power button up,the recorder will turn on,then you can
connect it with the USB cable to your PC for charging.

manual is only for reference purpose, as the user manual you receive it is a universal one for a series of recorders.
4.Please copy the files to the root category of the recorder,don't put music files in folder!
It can not recognize music files in folders.
It can not recognize music files in folders.

Package Included:
1 x 8GB USB EVP Recorder
1 x USB cable
1 x Earphone
1 x Microphone
1 x Audio cable
1 x Telephone cable
1 x Telephone/recording junction box
1 x User Manual

RED Pod (A Rem Device)

Unit Price: $89.99

This RED Pod is the exact same circuit as the popular REM Pod. Our circuit has an innovative circuit with a micro processor that recalibrate the energy every 5 seconds If any natural energy is detected, then the unit will recalculate and accommodate for that energy. If possible energy detection that is unstable then it will sound and light up leds accordingly, alerting you that there is something its picking up on. We included a new feature on our REM Device. There is a mode button on the unit which switches the unit into a tone generator which can be used as trigger object. Select the mode again to turn the unit back into an rem device. Here is the video link on Youtube:

Vibration Detector with Wireless Remote Shutt-off

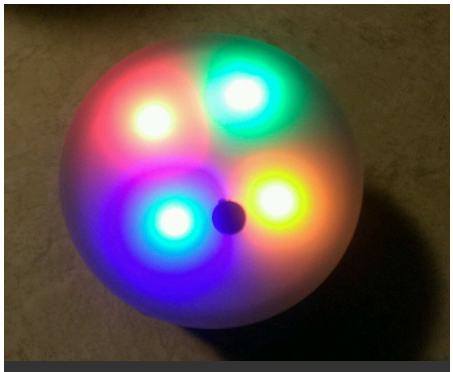
Unit Price: $20.00

Full Micro-Vibration Triggered Alarm with IR Remote Control, 120dB alarm sound which can last about 40 seconds, remote control range up to 20 meter (60ft), simple operation. These units can also double as trigger objects when placed on or near objects.

Features:
* Mini shape.
* Simple to operate.

* Wireless Vibration Alarm with infra-red remote control.
* Intelligent Wireless Geophone with handsome and decent appearance.
* Economical and practical.
* Alarm with ON/OFF switch, and remote control with Alarm and Disarm buttons for easy operation.
* 120dB alarm sound which can last about 40 seconds.
* Remote control range is up to 20 meter (60FT).
* Magnetic back and wall mount hole for easy installation.
* Remote control with keyring and clip for easy carrying.
* Powered by a GF22 DC 9V battery (not provided)

Specifications:
* Color: Black
* Housing: Plastics
* Alarm mode: Full micro -vibration triggered
* Control mode: Remote wireless control
* Alarm volume: ~120DB
* Duration of each alarm: ?40s
* Control range: Up to 20 meter
* Power: 1*GF22 DC 9V battery (not included)
* Wall mount hole diameter: ~7mm
* Alarm dimensions: 90*55*25mm
* Remote control dimensions: 50*40*13mm
* Net weight (alarm+control): 79g
* Package dimensions: 177*115*30mm
* Package weight: 138g



Unit Price: $60.00

Package including:(H4077)
1*IR Remote Control Full Micro-Vibration Triggered Alarm Wireless
1*User manual

Motion Pod with 360 Degree sensing capabilities.

This device can detect motion in a 360 degree way. Set this device in the center of any room and a camera on it, and watch what happens. We have had great results with this unit. Each sensor on this unit has been calibrated and calculated by an control chip. the

control chip in this device will sound alarm and light an led in the direction that the sensors says its detecting movement. It has a built in tone changing audio with the number of leds that has been lit. The more leds the lower the tone.

This unit has 4 pir sensors with a range of approx 20ft in distance. Will detect at a 45degree angle to a fine point.

Complete DXG Full Spectrum Camera Kit

Digital Full Spectrum Camera Kit With 32mb Flash Memory (Ghost Hunting Equipment)

Camera Specs.
This camera can see the Ir/UV light spectrum as it was professionally modified to do so.
Has a 32mb built in flash memory
Has a HC/SD Card reader with 32GB Memory support.
Support 4x AAA batteries
Support 1 FN-60 rechargeable battery (1200ma lasts approx 40min.)
Has a Mini HDMI port for 720p HD
Has USB 1.1/2.0/AV port
Has a bright 2.4" LCD Screen

From the Manufacturer The DXG-5B6V HD Quick-shots 720p HD Mini Camcorder is one sleek and capable HD camcorder. The DXG-5B6V HD Quick-shots records 720p HD video in H.264 MOV file format and can capture vibrant still pictures up to 16MP image resolution. What's more, the DXG-5B6V HD Quick-shots has HDMI output with HDMI cable included to connect easily to your HDTV, features a built-in voice recording function, supports high-capacity SD cards, and a bright 2.4" screen to frame your subject or review files instantly. Sexy and compact, the DXG-5B6V HD Quick-shots is designed so you can take it anywhere you go. Life is colorful, your memories should be, too!

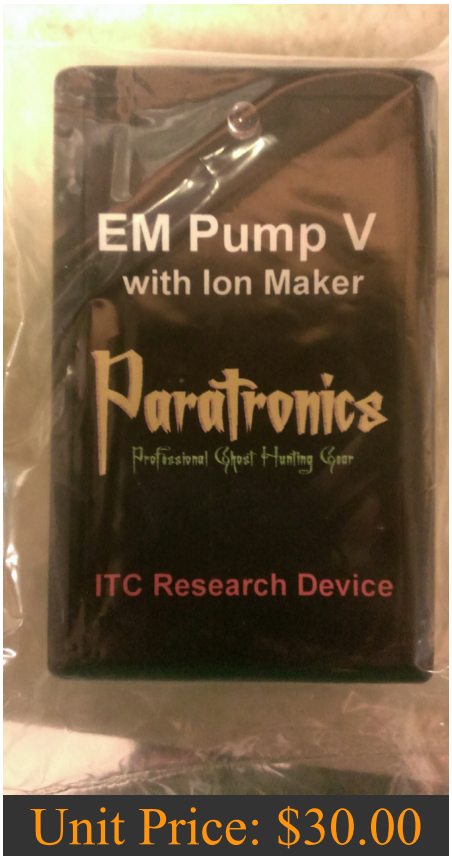
IR/UV Illuminator

This Illuminator was designed to see at a distance of approx 20 Ft. It has 10 IR Leds and 10 UV built into the design. Has a shiny backing to help illuminate the area your wanting to record. Featuring an tripod mount and a camera mount so its easy to use as a static camera. Has a 12volt input port and a adapter (included) so you don't loose light

when using as a static camera. For portability this unit also features an 9 volt door so you can use on the go. 9 volt will last approx an hour to hour and half.

This kit includes the following items:

DXG-5B6V PROFESSIONALLY MODIFIED FULL SPEC CAMERA
2 FULL CHARGED RECHARGEABLE BATTERIES
USB/AV CABLES
ADAPTER FOR HOOKING INTO AN CCTV SYSTEM
HDMI CABLE
CARRYING POUCH WITH BELT STRAP
USER MANUAL
IR/UV ILLUMINATION LIGHTING SYSTEM BY SIGHT
WALL CHARGER FOR RECHARGEABLE BATTERIES
AUTOMOBILE SIG CHARGER ADAPTER
1 32GB HCSD CARD WITH CASE (APPROX 7HOURS RECORD TIME IN 720P)
12-VOLT 1AMP WALL POWER ADAPTER FOR IR/UV ILLUMINATOR



Unit Price: $30.00

EM Pump V with Ion Generator

The all new EM pump 5 with ion generator built into the circuit is our newest pump. This pump is our most powerful pump yet. Using an innovative circuit, with no motors that hum during evps, or noise. This pump is rated at 150MG, and Ions is rated 120per second.

How to use:
Make sure you have a fresh 9-volt battery in the compartment. Simply turn on the unit, and when the led flashes, its activated. Place in a highly active area and conduct the evp session. and that's it.

Unit Price: $20.00

Ambient Temperature Meter

This Ambient Temperature Meter features an 1-1/4" X 1/2" LCD back-lit display. The

display shows you with an gauge and an digital readout. Has a button to select either Fahrenheit or Celsius. This runs off of one 9 volt battery. High sensitive thermistor provides accurate temperature readout.

10

Tri-Static Detector IV

This unit is more stable and has a tripod mount added (tripod not included). Running off of just 1 9-volt battery, and a life of over 2 days constant use, this detector is our best version yet. Faster detection, and we have made the orange Natural Energy Detector led go off only if it detects energy like ac current, or microwave, ect., as we have found that it would show a Natural energy where no energy is present, so we have recalibrate the sensor to be more accurate. We have included a picture of the circuit we use, to show you that our circuit is truly one of a kind. This meter has got to be one of the most useful tools as it will tell you exactly what type of energy you might be experiencing. When you see the blue led on, this indicates there is positive energy in the room. When the red led is on, means you have negative energy. White led indicates there is no energy present. and on the flip side it also has an orange led to verify if its man made or not, when lit its detecting some man made energy, so when using multiple units, you can also use this as a tracker. Every unit is tested b4 shipped. thanks.

Mini Ghost Detector

Micro circuit fits on top of a 9 volt battery

- Red and blue led tells you what type of Static energy thats present
- Clear Rubber casing allows for easy plug in and unplug
- Clear Rubber casing allows fully waterproof and Protects circuit
- Easily set out approx 6ft from each other for a grid to easily see and track the paranormal energy.

Digital Rechargeable EVP Recorder 8GB

Description

- This is a [8GB] USB Flash Digital EVP Recorder Pen with MP3 Function. Normal pen with rechargeable refill. Supports MP3, WMA, ASF, and WAV music formats. Long time voice recording.

Features:

- Separated recording & playing keys: one key for recording, one for playing
- VOR system: Voice Operated/ Activated recording (Automatically starts recording when there's sound and pauses when there's no sound.)
- Four recording modes:
- "SP" for high quality recording voice without distorting.
- "LP" for long time recording

- Power supply: 2 x 1.5V AAA battery (Not Included)
- Battery low power indication

- Built-in Lithium battery, rechargeable, saving your money and worry and protecting the environment
- Working temperature: 0~40ºC

Package Included:

- 1 x 8GB USB Voice Recorder
- 1 x USB cable
- 1 x Earphone
- 1 x Microphone
- 1 x Audio cable
- 1 x Telephone cable
- 1 x Telephone/recording junction box
- 1 x User Manual

Products that's in field test mode and will be released as we have finalized the product.

EFVA (Electronic Field Voice Analyzer)

This device is capable of analyzing evps in real time. Shows you on a bar graph when you listen to an evp in real time. Its also capable of recording every session you have so you will have the evidence needed to determine your outcome. With built in treble and Bass controls, allows you to adjust the tones for enhanced sound quality. Don't think for once this device don't have any power, this unit has a 5watt amplifier built into the circuit. The aux input allows other devices to plug into the unit. The unit can also playback your evp sessions.

Echo Box

This device when spoken to will keep repeating your question til it turns into white noise. Upon receiving an evp, this device will then repeat the answer if it captures the answer. With an 1 watt power microphone, this has enough power to capture even the softest of evps. And the 5watt built in amplifier allows you to hear the responses. (so far we recommend using high quality earphones with this device as an external speaker will interfere with the echo circuit.
